

EDUCATION

San José State University | Dec '25

- Masters of Science, Software Engineering
- GPA 3.42/4.00

San José State University | Dec '19

- Bachelor of Science, Computer Science
- GPA 3.54/4.00 (Cum Laude)

PROJECTS

DermaSight: AI Dermatology Assistant | Next.js, React, Vercel, MongoDB, Amazon S3 Jan '25 - Dec '25

- Designed and deployed a full-stack web application that analyzes uploaded skin lesion images using a trained ML model, enabling automated preliminary condition assessment via image-based inference
- Developed a responsive and accessible frontend using Next.js and React to let users upload skin lesion images and receive AI-driven analysis
- Developed core features like user profile management, image upload, prediction workflows, and chatbot assistant by integrating frontend components with backend APIs
- Enabled continuous updates and production hosting by deploying a production-ready application on Vercel

Email Spam Detection | Python, Scikit-Learn, Pandas Aug '25 - Dec '25

- Developed an end-to-end machine-learning pipeline for spam email classification using the CEAS08 and SpamAssassin datasets.
- Engineered structured features from email metadata and message content and combined them with TF-IDF text representations for logistic regression classification.
- Achieved approximately 99% accuracy on an in-distribution CEAS08 test set and 74% when evaluated against an independent dataset, analyzing the impact of dataset shift on model generalization.
- Built a command-line application that parses .eml files and performs spam classification using the trained pipeline.

Airport Management Website | React, Spring Boot, AWS EC2, AWS RDS Aug '22 - Dec '22

- Developed responsive React/Bootstrap interfaces for flight and passenger management workflows.
- Contributed to Spring Boot backend integration and relational database design for application data.
- Deployed backend services to AWS EC2 and configured AWS RDS for persistent database storage.
- Collaborated within an Agile team through sprint planning, wireframing, task tracking, and iterative feature development.

WORK EXPERIENCE

Retail Store Associate I Jul '21 - Present

Amazon - Fremont, CA

- Trained and onboarded new associates on operational workflows, safety procedures, and site best practices.
- Supported customer-facing Amazon Locker+ operations including returns, pickups, and inventory processing.
- Collaborated with the Associate Safety Committee to identify workplace safety issues and develop corrective actions.

Fast Food Cook Jul '16 - Jan '17

Jollibee - Union City, CA

- Collaborated with team members in a fast-paced, high-pressure environment to maintain efficient service during peak periods.
- Maintained consistent food quality and production standards while managing multiple time-sensitive tasks.

ADDITIONAL

Technical Skills: Python, JavaScript, C++, C, Java, SQL, HTML, CSS, React, Next.js, Flask, AWS, Git, Vercel, MongoDB, Scikit-Learn
